OTHER:

Attn: Director of Purchasing Marge Fink

Gentlemen:

In order to provide better and timely service for our customers we have hired a trucking company, specializing in the transporting of chemicals, to perform our pick-up services.

They will be billing us at the rate of \$30.00 per hour, for the loading or pumping of your material on to their vehicle, in excess of one (1) hour. It will therefore be necessary to pass on this additional charge, when applicable, to the customer.

In the future please indicate and sign on the yellow copy of our invoice or the Bill of Lading of the trucker the "time in" and the "time out" in order that a proper accounting of time might be obtained.

You may also consider, in the future, hiring a trucker for your firm directly. If you find it more economical to go directly to our or your trucker, we will be happy to continue our relationship as your disposal company.

Very truly yours,

Gene Conlon Jr.
Director of Transportation
